ESTABLISHED 1889
A Message from Kelly

Kelly Gardens

To Our Customers for 1924

This is our thirty-fifth year of distributing KELLY PLANT service. We appreciate this confidence and patronage and trust that we have merited a continuance. We have added greatly to our facilities and equipment for producing and distributing plants and service to you. We have added many plants to our catalog and our hope is that their use will make you happy and prosperous.

And I am, Yours to Command,

A. A. KELLY.

Owner of Kelly Gardens

Guarantee

Our modern equipment and facilities with skilled experts enable us to test seeds, or grow any variety of plants for you, at a very nominal cost. We have been designated as one of the testing stations for the Rare Plant Division of the U. S. Department of Agriculture. While I exercise every possible care to prevent improper mixing, labeling or descriptions, I am dependent upon the representations of seed growers as well as reversion of all plant life, therefore I cannot be held responsible beyond the purchase price paid us for plants, roots, seeds or cutting that I send you. If you are unwilling to accept my offering upon these terms, return a once and purchase price will be refunded.

We have Medals, Awards and Diplomas from all Expositions held in the west and northwest for 20 years upon the excellency of the KELLY GARDEN products.

LICENSED AND BONDED

I am licensed and bonded to the State of Washington to faithfully comply with the provisions of the law governing nurserymen and plant men. This statute is a great protection to the tree, shrub and plant-buying public, and equally beneficial to the conscientious grower and dealer.
Asparagus

The grower finds this vegetable about the first one that always finds ready sale at profitable prices, and the earliest income of his "out-in-the-open" crops. In addition it is so easily harvested and prepared for market that indeed it is a most acceptable crop. No garden, whether it be for the market or the home, is really complete without a bed of good roots. To the truck farmer who is looking for a money-maker crop that will fit well into his large areas of crop production, he will find nothing better.

CULTURE—Perhaps no other vegetable plant of so much importance adapts and accommodates itself to any and all conditions of soil and climate. It really succeeds anywhere, but the better the conditions the better the crop. We ordinarily advise to select a location to one side or one end of the garden, because, like any permanent crop, it may be out of your way in other garden operations. Mark out the lines or rows, preferably north and south, four feet apart, and plow out the line, going at least twice, to make a furrow trench six to eight inches deep. Stretch a line in bottom of furrow, marked with colored twine every 20 inches to two feet, and set plant at each mark, spreading out the roots carefully, covering the roots three or four inches deep with nice, moist soil and covering (note this carefully) the "crown" only one inch deep. When set the crown should be four to five inches below the original and level surface of the field. As the tiny shoots appear, work in the loose soil to the furrow gradually until by early fall the field is level. A row or two of most any vegetable can be grown between the rows the first and second seasons, which will at least pay all expenses upon the non-income asparagus crop. The third year thereafter cutting can begin and the season lengthened for cutting as the plants become more aged. A bed is good for 20 years at least.

In the fall, when the tops are matured (yellow), mow and burn. The asparagus is a gross feeder and can utilize any kind of manure. Early in the spring loosen the soil surface with a cultivator or other suitable tool, but remember the crown is only four or five inches below the surface. If the crown or bud is destroyed, the roots are valueless.

The culture for the kitchen is substantially the same, only that the plants may be set 15 to 18 inches apart each way; however, by close planting the life of the bed is shortened. Our best authorities differ slightly as to the best age of plants for setting, being equally divided between the one and two-year-old plants. Possibly the majority favor the one-year-old for large plantations, while two year old are recommended where land is comparatively expensive and for smaller fields of from one to two acres. A three-year-old plant will be found satisfactory in the kitchen garden, or "filling in" where plants have occasionally missed.

WHEN TO PLANT—Set plants in March, April, May, September, October or November, 5,000 to 6,000 plants per acre; 50 to 100 plants for home garden.

2 PALMETTO—The best acquisition to our comparatively few varieties. It is less subject to rust and insect enemies than any of the older varieties.

3 ARGENTEUIL—This comparatively new varie'y is becoming very popular. It has much to recommend it, coming as it does from the greatest asparagus growing section of the world, near Paris, France.

PRICES ASPARAGUS ROOTS—Not Prepaid—
1 year—Doz., 25c; 25, 40c; 50, 75c; 100, $1.00; 1,000, $6.00
2 year—Doz., 40c; 25, 50c; 50, 85c; 100, $1.50; 1,000, $10.00
3 year—Doz., 50c; 25, $1.00; 50, $1.50; 100, $2.25; 1,000, $15.00

371 WASHINGTON—Pedigreed. The new rust resistant variety. Our strain from the Department of Agriculture of the U. S. tested seeds.

PRICE OR ROOTS—Not Prepaid—1 yr.—Doz., 35c; 100, $2.00; 1,000, $15.00

POTTED PLANTS

FOR FROSTY AND COLD LOCATIONS

The positively sure method of success in maturing TOMATOES, EGG PLANT and PEPPERS in the short season localities so common in these northern latitudes is to set KELLY’S INDIVIDUALS. Thousands upon thousands of the KELLY INDIVIDUALS containing these semi-tropical plants are annually doing their duty in maturing their fruit under unfavorable conditions. The whole secret is in the strong, thifty plant, well hardened, growing in a specially prepared soil and the plant and roots are not in the least disturbed when resetting takes place. With this form and method, plants that are perishable by frost or inclement weather, until conditions are favorable, can be held and easily protected while growing all the year.

The additional cost of the KELLY INDIVIDUALS is a mere trifle when compared with the positiveness of the resultant crop.

The KELLY INDIVIDUALS plant pots are made from spruce veneer in two sizes. The small INDIVIDUAL is 2½x2½x3 inches and the large INDIVIDUAL is 4x4x3 inches. It makes no difference where you are located, whether it is in the high mountains or the low valleys, the KELLY INDIVIDUALS will reward you with matured TOMATOES, EGG PLANT and PEPPERS.

(Description, variety and prices will be found in the classified offerings throughout the catalog.)

FLOWERING PLANTS THAT WILL EMBELLISH YOUR HOME AND GROUNDS, SPEEDILY AND INEXPENSIVE IL, WILL BE FOUND ELSEWHERE.
CABBAGE

Set April 1 to July 1, 50 plants for kitchen garden; 5,000 plants per acre.

The cabbage, having been bred to stand much rough treatment, can be relied upon to produce even under unfavorable conditions. This plant as well as the whole family (Brassicaceae), is subject to the ravages of many kinds of insect pests. The most destructive, probably, is the green cabbage worm, the progeny of the pretty white-winged butterfly. Arsenate of lead is the sovereign remedy for all leaf eating insects—1 lb. to 40 gallons of water—and sprayed frequently. The aphis, which usually is only destructive to the late summer or fall cabbages, can be eradicated by thoroughly spraying with black leaf forty or tobacco spray. For field culture, set the plants 20 inches apart in the rows and rows 2½ to 3 feet apart. For the kitchen garden, or where intensive culture is practiced, set the plants 20 to 24 inches apart each way.

4 BRUSSELS SPROUTS (Half Dwarf)—A very palatable cabbage vegetable. Very easily grown and profitable for the market gardener. The cabbage aphis is about the only pest, but can be quickly exterminated by the timely use of tobacco spray.

Postpaid, Doz., 15c; 50, 50c

5 EARLY JERSEY WAKEFIELD—The standard early variety the country over. The largest, most compact and hardest of all early varieties, maturing in 70 to 80 days. Set plants April 1 to June 1.

Transplanted—Postpaid, Doz., 20c; 50, 75c; 100, $1.00; Not Prepaid, 1,000, $7.00

Not transplanted—Postpaid, Doz., 15c; 50, 50c; 100, 75c; Not Prepaid, 1,000, $5.00

7 COPENHAGEN MARKET—A new introduction from Denmark. While extensively advertised as an early, with us it belongs to the second early class. It is a strong grower and will be found satisfactory as a second early or as a late variety.

Postpaid, Doz., 20c; 50, 75c; 100, $1.00; Not Prepaid, 1,000, $5.00

8 DANISH BALL HEAD OR HOLLANDER—Set May 10 to July 1, 7,000 plants per acre. The leading variety for market or home use, maturing in 100 to 110 days. The shrewd market gardeners now plant nothing else. It will make a head under the most unfavorable conditions and scarcely exceeds seven pounds with the best conditions. For this reason it can be grown quite close, and because of its solid and uniform size it is always preferred by the merchant and consumer. Cabbage usually grows well and many seasons pays handsomely.

Seedlings Postpaid, Doz., 15c; 50, 50c; 100, 75c; Not Prepaid, 1,000, $5.00

9 CABBAGE, RED, FOR PICKLING—Field grown plants of all cabbage varieties, usually ready in June.

Postpaid, Doz., 10c; 50, 35c; 100, 60c; Not Prepaid, 1,000, $3.50

97 Cabbage—Early varieties, in FLATS...

98 Cabbage—Late varieties, in FLATS...

We deliver free to your express or postoffice all plants of 100 or less, except Asparagus Roots, Rhubarb Roots. In individuals, Flats and Potted Plants.

Cucumber

20 CUCUMBER (Individuals)—A hill of plants growing ready to set out, that will produce "slicers" weeks in advance of the usual seed grown.....Not Prepaid, Doz., 75c; 100, $4.00

21 DILL—The plant that gives the zest to dill pickles.

Plants—Postpaid, Doz., 15c; 100, $1.00

66 MATURED DILL—At pickle time........Postpaid, Bunch, 20c; Doz. Bunches, $1.50

19 CRESS (True Water)—A most delicious salad plant. While it can be grown in a very moist location, it thrives best when its roots are submerged in running water. Any suitable location should have a supply of water creas.

Postpaid, Doz., 30c; 100, $2.00

TEN LEADING CROPS THAT PAY IN EVERY MARKET AND EVERY SEASON

Strawberries Cauliflower Rhubarb Cabbage, Horse Radish Asparagus Peppers Tomatoes Onions Celery

STRAWBERRY HALLOCKS AND VENEER PLANT POTS

193 VENEER PLANT POTS—Size 2½x2½x3 inches. Made up ready to use. Can be used more than one season. Not Prepaid, 50, 85c; 100, $1.50; 500, $5.00

194 VENEER PLANT POTS—Size 4x4x3 inches. Made up ready for use. Can be used more than one season. Not Prepaid, 50, $1.00; 100, $1.65; 500, $5.75

195 VENEER STRAWBERRY HALLOCKS—Made up ready for use. Each one strong, well made and durable. NOT the folding up kind. We offer them with or without the 24-pot crate. (WRITE FOR PRICES.)

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"
CULTURE—A warm soil of medium fertility will grow good tomatoes. Irrigation is an aid, but much judgment should be used. Over-irrigation retards the ripening process. For field culture, mark out lines 4 or 5 feet, or if land is at hand, 5 feet by 5 feet. Set the plants at each intersection, just a little deeper than originally grown. Use a little water in setting, insuring a better stand if conditions after setting are unfavorable. Frequent cultivation (weekly) and artificial irrigation when the soil becomes so dry that assimilation of food cannot take place. The bacterial blight, or wilt, is a prevalent disease, and while no specific remedy is known, the Bordeaux mixture acts as a preventative. This is also true of the fungus or “black rot,” “blistor rot,” etc., attacking the fruit at the blossom end. The little black flea beetle (Haltica) is extremely troublesome for a short time, but with a good spraying or two with arsenate of lead (one pound to 4 gallons) or a good coating of the leaves with air-slaked lime will discourage the lively little black bug.

Staking, tying and pruning the plant can be practiced by the home gardener with profit, but to the average grower for market or canners, it hardly pays for the extra labor and expense.

We Grow Our Own

Tomato Seed

EARLIANA is unquestionably the greatest variety introduced. It is the earliest best tomato for the Northwest, for we have tested everything of promise to date. KELLY'S strain of EARLIANA is from selected fruit matured in this cool north. Set tomato plants from May 10 to July 1st. It will require for an acre, set 1x4 feet, 2,750 plants; 4x5 feet, 2,175, and set 5x5 feet, 1,750.

41 TOMATO—KELLY'S EARLIANA—Transplanted. Postpaid, Doz. 30c; 50, 85c; 100, $1.25; Not Prepaid, 500, $4.50; 1,000, $9.00; 5,000, $40.00

Not transplanted. Postpaid, Doz., 20c; 50, 50c; 100, 75c; Not Prepaid, 500, $2.50; 1,000, $5.00; 5,000, $20.00

58 TOMATO—KELLY'S EARLIANA—in FLATS. Each $1.25 by Express, Not Prepaid.

63 TOMATO—KELLY'S EARLIANA—in INDIVIDUALS. Not Prepaid, Doz., 60c; 25, $1.00; 50, $1.75; 100, $3.00; 500, $12.00

35 TOMATO—KELLY'S EARLIANA—in large 4-inch INDIVIDUALS. Not Prepaid, Each, 20c; Doz., $1.75; 100, $10.00

42 TOMATO (Dwarf Champion or Tree)—A very robust strong, sturdy plant that produces the most solid and handsome fruit of any variety. Its quality is unexcelled. Very popular with some of our customers. It is later than our Earliana. Transplanted. Postpaid, Doz., 30c; 50, 85c; 100, $1.25; Not Prepaid, 500, 40.00; 60, 500, $4.50; 1,000, $9.00; 5,000, $40.00

Not transplanted. Postpaid, Doz., 20c; 50, 50c; 100, 75c; Not Prepaid, 500, $2.50; 1,000, $5.00; 5,000, $20.00

15 TOMATO (D. C. or Tree)—in FLATS. Each $1.25 by Express, Not Prepaid.

71 TOMATO (D. C. or Tree)—in INDIVIDUALS. Not Prepaid, Doz., 25, $1.00; 50, $1.75; 100, $3.00; 500, $12.00

70 TOMATO (D. C. or Tree)—in large 4-inch INDIVIDUALS. Not Prepaid, Each, 20c; Doz., $1.75; 50, $5.00

NOTE—We do not recommend the NOT transplanted tomato plants for setting out in the field unless climatic and soil conditions are extremely favorable. In the higher altitudes and cold sections of the northwest, however, many of our customers use these NOT transplants for setting in cold frames, later setting in the field, with excellent results.

201 BONNY BEST—A little later than Kelly's Earliana. Attractive color, globular and solid. Worthy of trial. Transplanted. Postpaid, Doz., 30c; 50, 85c; 100, $1.25; Not Prepaid, 500, $4.50; 1,000, $9.00

202 BONNY BEST—in FLATS. Not Prepaid, $1.25

BONNY BEST is now used almost exclusively for forcing in hothouses. We have plants in January and on.

(Continued on next page)
Tomatoes Continued

120 TOMATO (Red Cherry)—Bright red, ripens early. Excellent for preserving.
121 TOMATO (Red Peach)—An early red fruit.
122 TOMATO (Red Plum)—Plum shape and size.
123 TOMATO (Red Pear)—Very similar to pear in shape. This variety, like the Cherry, Peach and Plum, is excellent for preserving, canning, etc.
124 TOMATO (Yellow Pear)—A very popular preserving variety.

Price of all Preserving... Postpaid, Dz., 30c; 50, 65c

PEPPERS

PEPPERS—Set May 15 to June 15. 10,000 plants per acre. Requires a rich, warm soil. All of our sandy and gravelly soils are well adapted to this plant. Set in rows 12 to 15 inches apart and the rows 2½ to 3 feet apart, or 15 to 20 inches apart, each way. The cilies use large quantities during "mango" and pickling season, and the peppers ship well long distances.

33 RUBY KING—The standard variety for many years. So sweet they can be eaten raw like an apple. In this latitude and climate will grow as large as the so-called Giants, and much more prolific. Postpaid, Doz., 30c; 50, 75c; 100, $1.00; Not Prepaid, 1,000, $7.00

34 PIMENTO—A delicious sweet-flavored salmy and stuffing pepper. The most popular in cultivation. Include this in your order. Postpaid, Doz., 30c; 50, 75c; 100, $1.00; Not Prepaid, 1,000, $7.00

36 TOMATO RED PEPPER—Hot Pungent. Riven anywhere in this latitude. Just the variety to give "zest" to pickles and other foods. The green cherries are just as pungent as when ripe and will keep a long time after gathering. When dried will hold their flavor for years. Transplanted... Postpaid, Doz., 30c; 50, 75c; 100, $1.00; Not Prepaid, 1,000, $7.00

11 CHINESE GIANT—The largest, sweetest pepper in cultivation. Bullnose type. Excellent for mangoses. GOOD HOPE FARM, Spokane County.— "The Ruby King and Chinese Giant Pepper plants that we received from you in Flats are simply wonderful producers. The Chinese Giant were too large for a standard shipping crate."—John Van Hess, Proprietor.

29 OKRA or GUMBO—The young seed pods are used in soups, stews, etc. Set out at tomato season time. Easily grown. Postpaid, Doz., 25c; 50, 60c

39 SWISS CHARD—A spinach beet top greens—an attractive vegetable and quite popular... Postpaid, Doz., 20c; 50, 75c

40 TOBACCO—Set plants in June, 2 feet by 3 feet, 7,000 per acre. We annually grow a small field of tobacco and believe there are many locations in the Northwest where tobacco can be profitably grown. Its value as an insect repellent in the garden and poultry house is well worth the time to produce it. Wise orchardists are producing their own tobacco for spraying, at a big saving.

WHITE BURLEY—The best variety for this locality. Postpaid, Doz., 20c; 50, 75c; 100, $1.25

Egg Plant

EGG PLANT—Set May 15 to July 15. Set plants 2x3 feet. A very delectable vegetable-fruit. Succeeds best on a warm sandy or gravelly soil that is fertile. If your soil is cold or season short use only your small or large INDIVIDUALS.

22 BLACK BEAUTY—The very best variety. Postpaid, Doz., 30c; 50, 75c; 100, $1.25; not prepaid—1000, $3.00.

190 BLACK BEAUTY—In FLATS. Each $1.25 by Express, not prepaid.

191 BLACK BEAUTY—In the INDIVIDUALS. Not prepaid. Doz., 60; 25, $1.00; 100, $3.00.

99 KALE—Chicken and Cow in FLATS. Each $1.25 by Express, not prepaid.

25 KOHL RABI—An excellent, easily grown vegetable. When cooked has the flavor of turnips and cabbage, combined. Postpaid—Doz., 20c; 50, 75c.

26 LEEK—A close relation to the onion family. Mild and pleasing flavor. Easily grown with plants. Postpaid 100, 35c; 500, $1.50

18 CHIVES (Schmittiau)—An onion-like plant with finely grown leaves. Invaluable for flavoring soups, stews and salads. One setting will last for many years as the roots multiply rapidly.

Postpaid, roots—15c bunch, Dozen bunches, $1.25

SEND US YOUR ORDER NOW, WILL DELIVER AS DIRECTED OR WHEN EACH VARIETY IS SEASONABLE.
SEED POTATOES

INCREASE THE PRODUCTION OF YOUR POTATO CROPS BY PLANTING PURE BRED SEED FROM STOCK THAT IS CAREFULLY GROWN FOR SEEDING PURPOSES.

The numerous diseases of the potato which are very infectious and generally unknown to too many potato growers, are very largely the cause of light yields and poor keeping.

The State inspection of growing seed potatoes and the State certification does limit to a minimum the serious danger of potato production. Recently, great discoveries have been made by our Federal and State pathologists in identifying diseases of the plant and tuber (together with methods of prevention and treatment). And investigators and scientists are aiding our growers of seed potatoes, which will overcome the great losses in potato production that occur very periodically.

Seed potatoes grown here, in the cool north, are very vigorous and where careful attention is directed to roguing and selection with the proper safeguards of spraying and treating, our Northern grown seed has responded by greatly increased yields.

165 POTATO—Early Ohio. They are all of good average size, strictly pure, smooth, and free from scab or rot. It is an especial favorite with marketmen, and the most profitable they can grow. Sprout is very strong and vines grow erect, making it easy to cultivate, and on account of early maturity you get the highest market prices. Will keep firm till late in the spring. Frequently sold under the name of Early Six Weeks. Desirable for late planting as they keep well for winter.

Postpaid, 1 lb., 20c; 5 lb., 75c; Not Prepaid, 25 lb., $1.00; 100 lb., $2.50

368 EARLY OHIO—State Certified. Not Prepaid, 100 lb., $4.00

369 EARLY OHIO—Small size to be planted whole. Not Prepaid, 100 lb., $2.00

166 POTATO (Netted Gem)—Known also as California Russet, Netted Burbank, etc. It is the best main crop potato today and of the highest quality. Exceptionally fine for baking.

Postpaid, 1 lb., 20c; 5 lb., 75c; Not Prepaid, 25 lb., $1.00; 100 lb., $2.50

370 NETTED GEM—Small size.

167 POTATO (Carman No. 2)—A real good main crop variety. White skin and flesh and a late keeper. Will produce a fair crop on light soils.

Postpaid, 1 lb., 20c; 5 lb., 75c; Not Prepaid, 25 lb., $1.00; 100 lb., $2.00

197 POTATO (Idaho Rival)—Very popular and good quality.

Postpaid, 1 lb., 20c; 5 lb., 75c; Not Prepaid, 25 lb., $1.00; 100 lb., $3.50

198 POTATO (Earliest of All)—An early white skin variety. (Not certified.)

Postpaid, 1 lb., 15c; 5 lb., 60c; Not Prepaid, 25 lb., 75c; 100 lb., $2.50

Horse Radish

CULTURE—Prepare ground as for any garden crop. Plant sets, sloping cut end down, in dibber holes, top of set one inch below surface. One foot apart in the row and rows 2½ to 3 feet, or set 20 inches apart each way.

23 COMMON VARIETY—Plant in April and May, 10,000 sets per acre. One of the most profitable of garden crops. Smooth, nice roots will always sell on any market. Always treat it as an annual by digging the entire crop every fall and winter and resetting each spring.

Postpaid, Doz., 30c; 50, $1.00; 100, $1.50; 1,000, $10.00

SEND US YOUR ORDER NOW, WILL DELIVER AS DIRECTED OR WHEN EACH VARIETY IS SEASONABLE.

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"
Sweet Potatoes

SWEET POTATOES
CULTURE—A warm, sandy loam is the ideal soil and should be reasonably well supplied with humus. Location should have southerly exposure. Set the plants on ridges, made by throwing two shallow furrows together and smoothing down, rounding with rake or light harrow, setting the plants (slips) 18 to 20 inches apart in the row, rows 3 feet apart.

44 SWEET POTATO PLANTS—Set plants in June, 9,000 plants per acre. Price of plants.
Postpaid, Doz., 30c; 50, $1.00; 100, $1.50; 1,000, $10.00

196 SWEET POTATO SEED—We will agree to properly pack and deliver to carriers in first-class condition but, under no circumstances will we guarantee safe delivery or sound condition to destination. Write for prices on sweet potatoes.

IN QUANTITIES—Postpaid, 5 lbs., $1.00; 20 lbs., $3.00

Herbs

Access to a supply of green-growing aromatic and medicinal herbs aid greatly in the culinary art of the housewife.

45 BASIL (Sweet)—An aromatic annual. For soups and sauces.
46 CARAWAY—Seeds used for pasy, bread, etc. Leaves are used for colic in children.
47 MARJORAM SWEET—Leaves used for dressings, brohs, etc. Dry the leaves for winter use.
48 SAVORY (Summer)—Used extensively for flavoring meats, stews, dressings, etc.
49 THYME—An aromatic perennial for seasoning. Its medicinal properties are highly recommended for sick and nervous headaches. All Herbs.

Postpaid, Doz., 30c; 50, $1.00

28 MINT (Spearmint) PLANTS—The flavor is a lasting, agreeable one, for sauces, stews, etc. Very hardy, perennial.

Postpaid, Each, 10c; Doz., 75c; 100, $4.00

38 SAGE (English Mammoth—Perennial)—So easily grown and most used of all herbs; every garden should have at least a dozen plants. Very hardy—indispensable for fowl dressing, winter sausage and head cheese.

Plants Prepaid, Doz., 30c; 50, $1.00

Not Prepaid, Each, 20c; Doz., $1.50; 100, $10.00

Cauliflower

It is generally supposed that this always high-priced vegetable is very difficult to produce. It is if your propagation stock, whether be seeds or plants, is inferior.

I am using the very best cauliflower seed produced, grown by one of the most expert growers in the world.

11 CAULIFLOWER—SNOWBALL—for the early crop, set during the first half of May. Late crops the most profitable, set May 10 to July 1, 7,500 plants per acre. Matures 50 to 100 days. We offer the very best imported direct from one of the most successful cauliflower seed growers in Europe. Fall matured cauliflower is a handsome paying crop; always ready sale in any market. Every fall and pickling season finds our markets bare of good, solid cauliflower.

Postpaid, Doz., 30c; 50, $1.00; 100, $1.25; Not Prepaid, 1,000, $7.00

74 CAULIFLOWER—Snowball in FLATS. Each $1.25 by Express, Not Prepaid, Doz., 50c; 100, $2.25

47 CHICORY—WITLOOF or FRENCH ENDIVE—The roots can be used when dried and parched as a substitute for coffee, but this variety is purposely grown for Witloof, used as a salad, both raw and cooked. Set the root in a trench, cover with soil 3 to 6 inches, and when the tops appear cut off an inch or so from the crown. This blanched “Witloof” or “French Endive” is an epicurean delicacy.

Lettuce

27 LETTUCE—Wonderful—if you want a big, solid head lettuce, let us supply your plants. Slow to run to seed.

Postpaid, Doz., 15c; 100, 60c; Not Prepaid, 1,000, $4.00

We have a stock of Grand Rapids Lettuce plants in any quantity from September to May for hot house and hot bed planting—Write for prices.

Ground Cherry Plants

43 TOMATO, HUSK or GROUND CHERRY—Unexcelled for canning, preserving, etc. Fruit of a handsome yellow color, easily grown and will keep a long time if husks are removed.

Postpaid, Doz., 30c; 50, 85c; 100, $1.25

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"
Rhubarb or Pie Plant

The large, fleshy stalks filled with pleasantly acid juice and used the year around. It is the universal favorite during the spring as a substitute for fruit, and its medicinal properties are well known. Peeled, sliced, packed in jars, cover with cold water and seal, it keeps indefinitely. Its season is lengthened by enterprising growers by digging the roots which are two years old or more in late fall, allowing to freeze thoroughly, and when frozen, set in dugout, cellar, furnace pit, under the green house benches, or most any place where sufficient soil can be placed around the roots, kept moist and dark at a temperature of about 45 to 55 degrees. Grown in this manner, the quality is superb, without much leaves or epidermis. The market grower will find this means of propagation very profitable, with scarcely any limit to the demand, being offered at a time when fruits and vegetables are scarce. The rhubarb is so easy of culture that no directions seem needed. It is so hardy that it will grow under the most unfavorable conditions, yet no plant responds better to high culture. It is a gross feeder of animal manures with sufficient moisture to liquify. In a word, no garden is complete without this easy growing and profitable plant. We offer you strong, sturdy roots.

37 MAMMOTH VICTORIA—There is nothing better regardless of the euphonious names given to this plant by some plantmen.

-NOT PREPAID-

1-year—Each, 10c; Doz., $1.00; 50, $3.00; 100, $5.00; 500, $15.00; 1,000, $30.00
2-year—Each, 20c; Doz., $1.50; 50, $4.00; 100, $6.00; 500, $20.00; 1,000, $40.00
3-year—Each, 35c; Doz., $3.00; 50, $8.00; 100, $15.00; 500, $53.00; 1,000, $100.

Onion Plants

30 ONION—Big plants ready to set out and will produce a more tender green onion and earlier than from sets. Will mature big bulbs a month earlier than from seed. Plants much cheaper than sets and more reliable than seeds sown.-------------------------------------------------Postpaid, 100 plants, 35c; 1,000 plants, $2.50
32 PARSLEY (Moss Curled)—A bed of parsley is a requirement in the kitchen garden. The "chef" will find many uses in garnishing and flavoring. The plants can be lifted in the fall, transplanted in boxes, set in a warm, sunny location and will furnish green sprigs all winter, or the leaves can be dried without the loss of flavor. Postpaid, Doz., 20c; 50, 50c.
67 PARSLEY ROOTS—For winter forcing. Postpaid, Doz., 50c; 100, $2.00
68 PARSLEY IN POTS—Place in your kitchen window and have green parsley all winter. Not Prepaid, Each pot, 35c

FLATS—A Sure Crop

FLATS, or shallow boxes, containing about sixty growing plants, is the most positive method of securing a 100% stand and a maximum crop, excepting only our POTTED INDIVIDUALS. If for any reason, you do not wish to set them out upon arrival, they may be kept for weeks, growing steadily. The plants are spaced evenly so that you may cut out a 1x2x3 inch cube of soil, with each plant, preventing wilting or setback.

Hundreds of our customers prefer KELLY PLANTS in FLATS for they are sure of a crop of vegetables and flowers.

We can supply FLATS of TOMATO, CABBAGE, KALE, PEPPERS, CAULIFLOWER, EGG PLANT, PANSY, CARNATION, KOCHEA, ASTERS, SALVIA, ETC. Note—For your choice in variety refer to classified plants throughout the catalog. FLATS each, $1.25, not prepaid. PARCEL POST OR EXPRESS.

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"
CELERY

CULTURE—Of the vegetables that are grown in large quantities, celery is unquestionably the most profitable. Three important requirements are essential—good plants, rich soil, plenty of shallow furrow two or three inches deep, set the plants seven inches apart and the rows four feet or more apart. Use a dibber (round pointed narrow stick), open the soil. Set the plant, firmly cover the roots, but do not cover the tiny heart of the plant. The double row is only adding another row of plants seven inches apart each way and the rows five feet apart. When the plant has grown five or six inches in height, firmly grip the plant near its top with one hand and draw the soil up to it, being careful not to let any soil get in between the leaves. This operation is called “tending.” Add the dirt as it grows until it is matured and ready for the market. Light boards may be used for bleaching by placing on either side of the row when plants have attained about 1 foot in height. The intensive system as we partly use it is to set the plants upon the level surface 12 by 12 inches apart each way.

Clean and frequent cultivation. No thinning required, as the closeness of the plant is sufficient to exclude light, which favors bleaching.

Our crops of White Plume celery are considered by all the finest ever offered in this market.

65 CELERY—White Plume—In FLATS. Each $1.25 by Express, not prepaid.

73 CELERY—Golden Self Blanching—In FLATS. Each $1.25 by Express, not prepaid.

12 PERFECT WHITE PLUME—This is a magnificent celery and most easily grown; its clear whiteness makes it an ornament to the table, and its quality well nigh perfect.

14 GOLDEN SELF BLANCHING—It has of late years sprung into popular favor and deserves much credit. It belongs to the dwarf varieties, not over 20 inches in height, solid, compact, yellow heart, finest quality. It is now grown to the exclusion of all varieties in California for shipping North and East. This variety will surely please you or your cus omers.

110 EASY BLANCHING—The production again in my fields this last season now convinces me that it is a very valuable addition to our celery varieties. It is a rapid grower and seems to me that it does not require the exacting conditions of the Golden Self Blanching. It bleaches to a beautiful white yellow and the best quality. It will keep fairly well, but severe frosts tend to make the leaf stalks pithy. Be sure to try this new variety.

CELERY PLANTS

TRANPLANTED—Postpaid, Doz., 25c; 50, 65c; 100, $1.00; Not Prepaid, 500, $3.00; 1,000, $6.00

Prices Celery Plants—White Plume, Golden Self Blanching. Easy Blanching—Postpaid, Doz., 20c; 50, 50c; 100, 75c; Not Prepaid, 500, $2.50; 1,030, $5.00

16 TURNIP ROOTED CELERY—In this variety of celery the roots have been developed and not the leaf stalk. The edible root is easily grown in rich, moist soil. Excellent for soups, stews, and makes a delicious salad.

Postpaid, Doz., 25c; 50, 75c

Attention Tomato Growers

We have grown a quality crop of Tomato seeds owing to the most advantageous season of 1922, that we have ever experienced. The fruit that we have selected for our own private stock is as near our ideal as is possible and is what we have been aiming to secure in the Italianian variety of Tomato. Our ideal has been a globular fruit ripening evenly, solid and with small seed cavities. Then the plant must have at least twenty uniformly developed fruit with fully as many more of like character but perhaps somewhat later in maturity. We have harvested a somewhat limited crop from these select specimens which we use for our plant propagation and offer it as our private stock. Our No. 1 stock of seed is from select specimens discarding all fruit that does not show globe tendency in shape and otherwise defective.

Pkt., 25c; ½ oz., $1.00; 1 oz., $1.50; 1 oz., $3.00

282 KELLY'S EARLIANA—No. 1 Selected. Postpaid.

Pkt., 25c; ½ oz., 50c; 1 oz., $1.50

372 CELERY (Golden Easy Blanching)—It is dwarf to half dwarf, growing about 25 inches in height, wonderfully stocky, very heavy, perfectly solid, of delicate flavor and a very good keeper, ready for the table or market in 118 days. Added to these points is its great distinctive feature of being literally self-blanching. Our Spokane customers say “it is the best ever seen on this market.” Supply limited.

Postpaid, Pkt., 50c; ½ oz., $2.50

376 NOTTS EXCELSIOR—A standard extra early dwarf pea. Height, 12 inches. Pods light green, 3 inches long.....Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., $2.00

374 TELEPHONE—The standard market gardener’s main crop. Bears an abundance of long, straight pointed pods, filled with large peas of a rich sugary flavor........Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., $2.25

375 GOLDEN WAX—Very popular, both for home garden and for market. The pods are of medium length, broad, fia, golden yellow, very fleshy, wax-like, and stringless.

BEANS—BUSH

376 VALENTINE—Pods are pale green, long and straight, round, meaty and of excellent flavor.

Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., $2.25

377 KENTUCKY WONDER—This variety is the most practically useful of the green podded pole bean. Suitable for use as snaps. Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., $2.25

POLE BEAN

378 GOLDEN BANTAM—This new sweet corn is described as the tenderest, sweetest and best sweet corn in existence. Postpaid, 1 lb., 25c; Not Prepaid, 10 lbs., $2.00

Use KELLY PLANTS and have better GARDENS than your Mother ever had.

(Continued on next page)
Vegetable Seeds

379 EARLY EVERGREEN—This variety is more largely planted than any other, being the general favorite with market gardeners for late use. Postpaid, 1 lb., 25c; 10 lbs., $2.00

ATTENTION—PEPPER GROWERS

We are offering an extra fine quality stock of the popular varieties of peppers. It is almost unbelievable that in this far north latitude that this semi-tropical plant can be propagated so as to mature its fruit for seed production. We have harvested a good crop of seeds in the following varieties:

283 PEPPER (Ruby King) — Postpaid, Pkt., 25c; ¼ oz., 30c; 1 oz., $1.00

284 PEPPER (Pimente) — Postpaid, Pkt., 25c; ¼ oz., 30c; 1 oz., $1.00

285 PEPPER (Chinese Giant) — Postpaid, Pkt., 25c; ¼ oz., 30c; 1 oz., $1.00

112 ASPARAGUS-(Argenteuil)—A comparatively new French introduction. Very popular in our Southwestern states. Disease resistant. Postpaid, oz., 20c; ¼ lb., 60c; 1 lb., $1.50

113 ASPARAGUS (Palmetto) — The very best variety. Finest quality and best for planting. Postpaid, oz., 20c; ¼ lb., 45c; 1 lb., $1.25

114 BEETS (Early Egyptian) — Dark Red. Postpaid, oz., 15c; ¼ lb., 40c

115 SWISS CHARD (Lucullus)—A very delicious vegetable, easily grown. Postpaid, oz., 15c

116 BRUSSELS SPROUTS — Postpaid, Pkt., 10c

100 CAULIFLOWER (Snowball) — Postpaid, Pkt., 25c; ¼ oz., $1.00; oz., $3.00

117 CABBAGE (Early Jersey Wakefield)—The earliest best cabbage in existence. Postpaid, Pkt., 10c; oz., 30c; ¼ lb., $1.00

106 CABBAGE (Copenhagen Market)—The largest of the second early varieties. Postpaid, Pkt., 10c; oz., 30c; ¼ lb., $1.00

105 CABBAGE (Danish Ball Head)—The best late cabbage grown. Postpaid, Pkt., 10c; oz., 30c; ¼ lb., $1.00

118 CABBAGE (Red Rock)—Best for pickling. Pkt., 10c; oz., 35c

119 CARROTS (Oxheart)—An easily pulled table variety. Pkt., 10c; oz., 20c

102 CELERY (White Plume)—The most popular white variety. Pkt., 15c; oz., 50c

103 CELERY (Golden Self Blanching)—A handsome fall and winter celery. Pkt., 20c; oz., $1.50

126 CELERY (Easy Blanching)—A new variety. White-yellow heart with green leaves. Pkt., 15c; oz., 50c

127 CUCUMBERS (Davis Perfect)—The best slicing cucumber. Pkt., 10c; oz., 15c; ¼ lb., 50c

128 EGG PLANT (Black Beauty)—The best variety. Pkt., 10c; oz., 50c

129 KOHL RABI (Early Purple)—A reliable vegetable with the flavor of cabbage and turnip combined. Pkt., 10c

131 DILL—Produces a plant the whole of which is used for flavor pickles. Pkt., 10c; oz., 25c

132 KALE (Dwarf)—A fall and winter green. Pkt., 10c; oz., 25c

133 KALE (Chicken and Cow)—This plant produces more green food for chickens and cattle than any other plant. Pkt., 10c; oz., 25c

134 LETTUCE (Grand Rapids)—A leaf lettuce for greenhouse and outside. Pkt., 10c; oz., 30c

135 LETTUCE (Wonderful)—The best head variety. Pkt., 10c; oz., 30c

136 MELON MUSK (Rocky Ford)—A deep netted standard variety. Pkt., 10c; oz., 25c

137 MELON (Honey Dew)—A new type of melon, claimed to be the cross of the muskmelon and the casaba. Pkt., 15c; oz., 40c

138 WATERMELON (Kleckley’s Sweet)—The best early melon. Pkt., 10c; oz., 25c

139 PARSNIPS (Hollow Crown)—The best variety. Pkt., 10c; oz., 20c

140 PARSLEY (Moss Curled)—The leading variety. Pkt., 10c; oz., 20c

144 ONION (Prizetaker)—A large, mild light yellow skin. Pkt., 10c; oz., 30c

145 ONION (White Globe)—A large white, good keeper. Pkt., 10c; oz., 30c

146 PUMPKIN (Sugar)—The sweetest for pies. Pkt., 10c; oz., 25c

147 RADISH (Early Scarlet Turnip)—The quickest and best. Pkt., 10c; oz., 20c

148 SPINACH (Bloomsdale Savoy)—The finest quality. Pkt., 10c; oz., 20c

149 RHUBARB (Victoria)—The mallow variety. Pkt., 10c; oz., 20c

151 TOMATO (Dwarf or Tree)—A sturdy, vigorous growing plant that produces the very best quality in fruit. Pkt., 10c; oz., 25c

152 SQUASH (Giant Crookneck)—A good early variety. Pkt., 10c; oz., 20c

153 SQUASH (Boston Marrow)—A fine quality late summer and fall squash. Pkt., 10c; oz., 20c

154 SQUASH (Hubbard)—The best fall and winter variety. Pkt., 10c; oz., 20c

157 RUTABAGA (Purpletap)—A superior yellow variety. Pkt., 10c; oz., 20c

158 TURNIP (White Globe)—Fine quality. Best for market. Pkt., 10c; oz., 20c
The New Strawberry
Kelly’s Spokane

Standard Varieties of
Strawberries
We Have No Strawberry Pests
STATE INSPECTED

CULTURE—To secure extra large fruits, the
bushes will require large, well-drained plat- 
ting where the soil is free from disease and pests. No 

100, 5, 25; 5, 25; 50; $1.75; 100; $5.00.

SPokane—Postpaid, 25c; 25c; 50c; $1.00; 
100; $1.75; Not Prepaid.

CHESPEAKE—We have added this most popular 

19. NICK OHMER—This variety is universal favorite, 
especially noted for its fine, rich flavor, for its large, 
well-shaped berries and rich crimson color of its fruit.

17. MAJON—Indeed in this splendid berry we have 
almost perfection. First quality, productive, attractive 
shape and color; nothing better for canning. For the 
local market or home garden, surpasses its equals, and 
with but few equals.

18. HOOD RIVER—The leading standard shipping variety, 
the berry that has made the Hood River fruit famous, 
and its growers financially rich. Rich red color, uniform 
size, good quality, but not heavy in yield. A specialty berry for the 
grower; whose market is somewhat distant.

19. NEW OREGON—A comparatively new variety, originating in 
the state which bears its name. It belongs to the 
Hood River type, or Wilson’s Alhambra, and the cluster 
for its supremacy is in its great productivity, not losing the shipping 
qualities of the famous Hood River. The young plants are 
most robust, and have the characteristic of a variety that 
will prove very successful on all kinds of soil.

20. GOLD DOLLAR—A California variety. The first imported 
berry that was grown in our state worth while. Medium in 
size, conical in shape, light red in color. It is the first early 
berry that has been considered of sufficient merit to 
catalogue.

21. GLEN MARY—A bright, handsomely standard sort, 
grown the country over and perfectly reliable.

22. SENATOR DUNLAP—Its color is a rich dark red with 
many shades, and its crop has become a 
ble of its uniformity. The plants are rather small but 
strong and vigorous and carry much pollock, which usually 
insures a heavy crop production. In yield it compares favor-
ably with any variety.

The New Strawberry
Kelly’s Spokane

SECURED BY SELECTING FROM TYPES THAT HAD OUTSTANDING
CHARACTERISTICS APPROACHING OUR IDEALS FOR AN ADAPTABLE
VARIETY FOR THE COMMERCIAL GROWER AS WELL AS FOR THE
HOME GARDEN IN OUR GREAT WEST.

It is a standard variety and so far in our trials it has had no inclination
to bear fruit the first season but develops its energy into building itself in a
large plant for the big crop to follow in succeeding years.

The ambition of every plant propagator is to increase the ascension
characteristics of strawberries that will meet the requirements of his present
and prospective customers at least those of quality, quantity and adaptability.

We are offering the SPOKANE in quality, equal to any variety of the
forty or more that we have tested. It is as prolific as even the best of 
standards and gives promise of adopting itself to most any soil in the
west. It is a very strong plant with unusual large, thick leaves that will
prove to be a strong drought and fungus resistant. It seems tending in
heavy plant production which is encouraging for large and heavy fruit pro-
duction.

Our efforts have been directed to the introduction of a strawberry plant 
that will yield a heavy crop of fruit the second and third season after plant-
ing upon our unirrigated soils, with the SPOKANE as the result and it 
will exceed the expectations of the most sanguine in the irrigated sections.

It is a mid-season, climacteric, maturing during June and July in a wide-
temperature climate.

WE UNHESITATINGLY RECOMMEND THE SPOKANE FOR
YOUR PLANTING.

That the SPOKANE will have rapid and universal distribution we have
priced them very reasonable.

80. AROMA—While a trifle better than the intermediate varieties, it will 
yield a very large part of its crop in the very first pickings; it will con-
tinue about as late as Gandy, and with us it produces a fair picking af-
ter every other variety has quit. It is planted extensively both North
and South.

191. WARFIELD—The most popular politicians variety grown. It is large, 
beautiful, con-shape berry with a delicious, dark red exterior; the deep 
color is evident from the center of the fruit. Any variety that we 
offer will fertilize except Gandy or Aromas.

82. CLARK’S SEEDLING—This variety originated in our state; a setting
of the old popular Wilson variety. Like the Hood River, a near rela-
tion, it is unsurpassed as a shipping variety, and in sections it grow-
up.

159: SPOKANE Postpaid, D20, 25c; 50c; $1.00; 100; $1.75; Not Pre-
paid, 500; $2.50; 1000; $10.00.

“In A Good Plant the Crop is More Than Half Grown”

Progressive
Everbearing Strawberry

EVERBEARING STRAWBERRIES are the greatest addition to the small
fruit family that has ever been introduced. Anyone can appreciate the eco-

donomic value of the EVERBEARING when we consider production has been
bested at least nine months.

Think of picking ripe fruit ninety days from the setting of the plant
and continually fruiting until the freezing of the fruit and plant nearly
the fruit, in the early winter.

From the following spring, the EVERBEARERS resume their activities
with all varieties of strawberries but differ from the standard varieties, in
that the EVERBEARERS continue fruiting all the summer and fall. KELLYS
PROGRESSIVE and SUPERB have repeated their continuous fruiting from
spring till winter, for four years in succession, and the last years crop
is as good as either of the other years, with this possible exception, that the
first year's fruit seemed a little larger than other years production.

Among our two hundred customers where trial and conditions do not pro-
hibit, they are very enthusiastic in their report, that the KELLY EVER-
BEARERS have produced continually for more than one year, before the
period of dormancy took place. This is accounted for by the well known
established fact that the KELLY PLANTS grown in the cool north, free from
disease and pests, are vigorous and capable of heavy production.

93 PROGRESSIVE—Postpaid, 200, $9.00; 300, $9.00; 500, $7.50; 1,000, $10.00

Everbearing

Superb Strawberry

No matter where you live we can send you SAFELY the KELLY EVER-
BEARERS and today make out your order and enjoy delicious strawberries all
of this summer and succeeding years.

For many years we have been improving EVERBEARERS by selection
and careful roguing so that we are confident that we have in the KELLY
SUPERB and KELLY PROGRESSIVE strains the most perfect, best quality
and TRUE EVERBEARING to be had from any source. Big crops of this
fruit in Strawberries are the result of rich soil and abundance of moisture.

With the KELLY STRAIN you need not remove the first

BLOOMS.

Our stock of EVERBEARERS is large and we expect to fill every order
this season but we know it is good advice to permit us to hold your orders
early. We usually begin digging EVERBEARERS in March. Early

92—STRAWBERRY SUPERB—Everbearing. The fruit is large, firm and of
the best quality. We recommend this variety strongly, for a market berry.
Postpaid, D20, 20c; 25c; $1.00; 100; $2.50; Not Prepaid, 200, $1.50; 100; $1.00; 500, $1.00.

10, 45, 50, 100; $10.00."

99—MANURE—Animal. As everyone knows animal manures are the best food for a hungry, poor soil. Not only the fertility that it contains but the organic matter is equally essential to plant growth. We decompose hundreds of tons annually and offer this “best of all” fertilizer well rotted. Price not prepaid—25 lbs., 75c; 100 lbs., $2.00; One ton, $20.

200—NITRATE OF SODA—This salt is the most quick acting stimulant to plant growth known. We have had plants to change their color in four days’ time by the use of nitrate. Not prepaid—1 lb., 10c. Write for prices on quantities.

GOOD HOPE POULTRY FARM, Spokane, County.—“The Chicken KALE plants that you have grown for us has given us excellent results. It supplies an abundance of the best and cheapest green food for our thousands of poultry, from early summer clear into the winter. We will want again for next spring, thousands of Chicken KALE in Flats.”

JOHN VAN HEES, Prop.

Many of the largest growers of Strawberries, Tomatoes, Peppers, Cabbage, Asparagus, etc., secure their plants from us, realizing that our stock is more productive and consequently more profitable than otherwise secured.

Please remember that lower prices than ours must sacrifice quality, variety or condition of plants when you receive them. Our prices are as low as is consistent with plants or stock freshly taken from the soil, graded, nicely bunched, packed in clean solid containers, so that when you receive them the plants will be fresh and vigorous.

We realize the lack of detailed description in our catalog, but must condense as much as possible to reduce the expense which is better made up in good stock delivered to our customers in first class condition.

Our plants are produced from select varieties of seeds and our years of experience and skill will give you a plant that will reward you with a sure crop for market or home.

Please remember that the successful and profitable crop or the ornamental beauty of the plant will remain with you, long after the price for the propagated plant is forgotten.

FERTILIZERS

All prices are net, packed, crated and delivered to transportation carriers here. Express is the usual means of transportation, but parcel post is often the most convenient. To stations where there is no agent all express must be prepaid. Send sufficient to pay. Any excess will be refunded at once.

Parcel Post charges in first and second zones up to 150 miles from Spokane on strawberry plants are as follows: On 500 plants, about 50c, and on 1,000 plants from 60c to $1.00.
Flower Seeds

CANTEBURY BELLS, Biennial.—The seed may be planted where they are to bloom. Mixed colors. Pkt., 10c

FOXGLOVE (Digitalis) Perennial.—Does not normally bloom until the second year. Produces brilliantly colored flowers. Plants three feet. Mixed. Pkt., 10c

GAILLARDIA, Annual.—Remarkable for the profusion, size and brilliancy of its flowers. Pkt., 10c

ALYSSUM (Sweet Alyssum) Annual.—Used extensively for border or bedding flowers. Pkt., 10c

ASTER (Crego’s Giant) Annual.—The finest of the aster family, producing immense flowers of a fluffy texture. Very fine for cutting. All colors mixed. Pkt., 15c

CALIFORNIA POPPY (Eschscholtzia) Annual.—An attractive, profuse blooming plant for beds, edging or masses. Blooms from early summer until frost. All colors mixed. Pkt., 10c

CALLIOPSIS (Coreopsis) Annual.—An excellent plant for cutting and massing, blooming all summer. Mixed colors. Pkt., 10c

CANDYTUFT, Annual.—This flower makes a very attractive border or cut flower. Mixed. Pkt., 10c

KOCIA (Mexican Burning Bush) Annual.—Plants are rounded and globe-like which in the early fall are thickly set with small bright scarlet flowers. Grows three feet tall and is excellent for summer hedge. Pkt., 15c

LARKSPUR (Delphinium) Annual.—One of the best of garden plants. Will bloom from late summer until frost. Pkt., 15c

LOBELIA, Annual.—Well adapted to bedding or edgings, being always completely covered with blue flowers. Height, six inches. Pkt., 15c

MIGNONETTE (Sweet Scented) Annual.—Produces dense spilces of exceedingly fragrant flowers. Pkt., 10c

MARIGOLD (Tall Double African) Annual.—This old time favorite with its wonderful shades of yellow should be in every flower garden. Height, three feet. Pkt., 10c

NASTURTIUM (Tall) Annual.—Elegant and luxurious climbers for veranda pieces and trellises, etc. Mixed. Pkt., 10c

(PHLEX DRUMMONDI) Annual.—One of the finest bedding plants grown. Blooms from early summer until frost. All colors mixed. Pkt., 10c

PANSY (Mastodon) Perennial.—Plants may be started indoors and transplanted for late summer and fall blooming. They thrive best in cool moist soil. Fine mixed. Pkt., 25c

SWEET PEA MIXTURE.—Made up of true Spencer varieties. Pkt., 10c; oz., 40c

We appreciate your kind orders and we offer you the very best that human skill can produce with the best possible service and a full dollar’s worth of value for each dollar entrusted to us.

PINKS (Dianthus) Annual.—One of the most popular old fashioned flowers. Produces a wonderful variety of brilliant colors. Mixed. Pkt., 10c

PORTULACA (Moss Rose) Annual.—Bears fine for massing or edging. Should be started indoors. Planted in sunny locations. Single mixed. Pkt., 10c

SALPIGLOSSIS (Painted Tongue) Annual.—Produces beautiful orchid-like flowers. All colors mixed. Pkt., 10c

SALVIA (Scarlet Sage) —Tender perennial. Blooms the first season from seed. Blossoms are long on tall stems in racemes or spikes and are very beautiful. Pkt., 10c

SHASTA DAISY, Perennial.—Very attractive, large white flowers, four to five inches in diameter, broad white petals and stems. Pkt., 10c

SNAP DRAGON (Antirrhinum) Annual.—Very desirable for beds and edgings. Mixed. Pkt., 10c

SWEET WILLIAM, Perennial.—Grows one to two feet tall, and bears its sweet scented flowers at the ends of a stiff stem. It makes a beautiful bedding plant. Single mixed. Pkt., 10c

VERBENA, Annual.—Verbena thrive in almost any situation and in all good garden soils. They make attractive borders and beds, blooming profusely from June until October. Mixed. Pkt., 10c

PETUNIA, Annual.—Excellent for porch or window boxes or general flower garden. Mixed. Pkt., 10c

ZINNIA, Annual.—This type is wonderfully adapted to borders or beds. The plants are compact and are covered with a multitude of flowers all during summer and fall. Mixed. Pkt., 10c

SPENCER SWEET PEAS
The Giant Waved or Orchid Flowered

HOLLYHOCK (Chatel’s Double) —Perennial. One of the most of majestic hardy plants. Pkt., 15c

GYPSOPHELIA (Baby’s Breath) Annual.—Delicate free flowering little plants covered with small white star shaped little flowers. Pkt., 10c

FORGET ME NOT—Half Hardy. Perennial. Neat and beautiful plants with star-like flowers. Pkt., 10c
Because we make a specialty of growing them to perfection, and make it our point to give you SERVICE, QUALITY AND VALUE. Our plants make REAL ROOTS, and what is more important to a Perennial than a GOOD ROOT SYSTEM?

All plants offered in this list are strong, field-grown, the only Perennials that give satisfaction.

**DIELYTRA (See Gypsophila)**

|          | $	ext{3.00}^+$  |

**SPECTABILIS (Bleeding Heart or Seal Flower)**—An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive; it is used largely for forcing, and is perfectly at home in any part of the hardy border, and especially valuable for planting in the shade.

|          | $	ext{7.50}^+$  |

**EXZMA (Plumy Bleeding Heart)**

|          | $	ext{8.00}^+$  |

**DIGITALIS (Foxglove)**

One of the most popular plants of today, throwing a flower spike, tall and strong to the height of 4-6 feet. July-August.

|          | $	ext{3.00}^+$  |

**DORONUCUM (Leonard's Bane)**

|          | $	ext{3.00}^+$  |

**CAUCASICUM**—Large bright yellow flowers, one of the most effective early spring flowering perennials. Effective as a pot plant, or in a hardy border. It is a splendid flower for cutting, as it is-Ike an annual plant, and stands a long time in water.

|          | $	ext{3.00}^+$  |

**GYPSOPHILA (Baby's Breath)**

Very branching or spreading slender herbs, with scant foliage when in bloom. Of easiest culture in open, rather dry places. Desirable where a mass of delicate misty bloom will fill in a bare place.

|          | $	ext{3.00}^+$  |

**PANICULATA COMPACTA—**When in bloom in August and September, it forms a symmetrical mass 2 to 3 feet in height and as much wide through, of minute white flowers having a beautiful grass-like appearance. Postpaid each, 30c; dozen, $3.00.

**HEMEROCALLIS**

Yellow Day Lily

Lemon Lillies, or Hemerocallis flava, have long been favorites in our garden, and are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful grass-like foliage is very handsome and sets off the charming, lily-like
flowers very effectively. They look particularly well naturalized along streams or on moist banks and will thrive most abundantly in sandy, loamy, or moist, well-drained soil. 

FULVA (E.own Day Lily)—Coppery orange, shaded crimson. 3 feet. July...

HEUCHERA (Sanguinea) 
Blooms in May. 12 to 18 inches. June to September. Flowers bright crimson; very free-flowering. Nice for cutting. Excellent for rock-garden...

NEW GIANT-FLOWERING MARSHMALLOW OR HIBISCUS 
A wonderfully improved form of our greatly admired native Marshmallow. Rose-purple in color which not only the colors have been greatly intensified, but in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed equally at home in all positions, having the same vigor in dry and wet ground; perfectly hardy. They grow from 3 to 5 feet high and are very floriferous, blooming from early in July until late in September. We offer three distinct colors: Red, Pink and White.

1 year...

2 years...

HOLLYHOCKS 
Under our improved methods we grow Hollyhocks that are absolutely FREE FROM RUST. Do not make a mistake and buy without this assurance.

DOUBLE VARIETIES MIXED...

IRIS FLAGS (Liberty Iris) 
The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it, it throws up spikes of bloom that are marvelous in their delicate structure and the colors which its exquisite dainty are wonderful in their blendings and variety.

They are very effectively blended with groups and if used for borders are particularly desirable in that they remain fresh and up right after the blossom stalks are removed.

FLORENTINE ALICE—flawed lavender, very early and fragrant, fine cut flower.

PULMIA—Purple blue, a deep violet purple.

SAN SOUCI—Caynary yellow.

PERFECTNESS—Standards fresh lavender, flecked with deeper shade; falls rich velvety lavender, dark red veiny. A most pleasing and highly attractive combination, very well named. Has blossoms on one stalk rather than the other sort.

LATHYRUS LATHYFOLIUS (Perennial Sweet Pea)—A vigorous climber. Suitable to cover unsightly places. Flowers all summer; excellent for cut flowers.

SEPARATE COLORS—Red, pink and white.

WHITE PEARL—A fine white.

PINK BEAUTY—A very fine cut flower, beautiful pink.

LILY OF THE VALLEY (Pips)—...

Postpaid, Each... $50...

LILUM (Hardy Lily) 
TIGRINUM SINGLET—The well-known Single Tiger Lily, Each...$50; Nymbois—Beautiful small blue flowers, excellent for floral decorations and designs. In a moist sandy place the flowering period may be much prolonged.

Postpaid, Each... $35; Doz... $2.25

PAPAYA (Poppy) 
NODICAULE (Iceland Poppy)—A neat dwarf-like plant, from which sprang graceful leafless stems with charming cup-shaped flower in great abundance, throughout the entire summer, making them the most desirable cut flower. We offer them in separate colors: orange, white, yellow.

ORIENTAL ( Oriental Poppy)—Nothing in the hardy plant line can compare with the Oriental Poppy for brilliancy and beauty. With their large fiery scarlet flowers, they are conspicuous in any position. 3 to 4 ft. June, May, 2 years old. Each... $35; Doz... $2.00

PENSTEMON (Beard Tongue) 
PENSTEMON (Beard Tongue)—A handsome plant with graceful slender stems covered almost the entire length with bright colored flowers; excellent for cutting.

BARBATUS FORZETY—Bright Scarlet. 3 to 4 ft. June-Aug. Each... $35

PHLOX (Hardy Perennial) 
Beauty and usefulness bring these hardy border plants among the greatest of importance. For massing they are very effective and their graceful beauty of color will add beauty to the landscape. Their flowering season begins in July and when the past bloom spikes are removed, the blooming period may be prolonged for another season. 

RIDGEDALE—Pure white with red eyes, extra tall.

EUROPE—White, large red center, large.

ISABEL—Salmon pink.

JEANNE D’ARC—Pure white, late flowering.

FAUST—White with crimson center.

LA VAGUE—Lavender.

MICHAEL BUCKNER—Dark purple.

Postpaid, Each... $30; Doz... $1.00

   In 4 inch pots—Each, 35c to 60c

260 HYACINTHS—Mixed colors.
   In 4 inch pots—Each, 40c to 75c

WRITE US your wants in Potted Plants. We grow many not listed here.

Everblooming Cannas

No flowers will make such an attractive bed. Rapid in growth, freedom of bloom and ornamental foliage makes them so desirable for planting in beds, on lawn or yard, and especially after early blooming bulbs are done.

KING HUMBERT—A glorious Canna. The finest we have ever seen. Grows to a height of about 5 feet. Immense dark bronze foliage with great heads of orange-scarlet flowers, striped crimson.

GOLDEN GATE—3 1-2 feet. Blooms when opening are almost pure gold, but soon change to orange-crimson and apricot, with deep carmine red at throat. Very striking.

WINTZER'S COLOSSAL—4 feet. The gorgeous, vivid scarlet blooms produced all summer long. Blooms retain their color during the hottest weather.

AUSTRIA—Chrome yellow. Pretty.

CRIMSON BEDDER—Crimson. Beautiful.

MME. CROZY—A vermilion with a gold edge.

WYOMING—A large showy orange color.

NOT PREPAID—All Cannas in 4 and 5 inch pots.
   Each, 35c; Doz., $3.50

...
ROSES

THE QUEEN OF FLOWERS

Plant a ROSE and enjoy the pleasure of their beauty, the fragrance of their bloom, the wonder of their color and the admiration of your friends.

SOME SUGGESTIONS AS TO PLANTING AND CARING FOR THEM

Roses can be planted either in the fall or spring when there is no frost in the ground. Early planting is best. Where mild climatic conditions prevail, fall planting is recommended.

Dig the hole eighteen inches deep; cut off broken or injured roots; hold the plant in position, spread out the roots so they do not cross or crowd one another at any point, fill in the holes carefully with the fertile top and soil, pressing it firmly about the roots. A small handful of finely ground bone meal sprinkled in is very helpful. After the hole has been filled and dirt pressed firmly, cut back the top canes one half to two thirds, then mound loose dirt up about them for six to ten inches. This mound of dirt should be placed about the canes whether the Roses are planted in the fall or spring—otherwise they are apt to dry out. If the Roses are planted in the fall, this mound should be covered with a thick mulch of straw or leaves. As soon as the buds start to grow, rake away the mound and cut back the canes, leaving two to four buds to each cane. Make this cut just above a sound outside bud, so that the new canes will grow outward and make a shapely bush.

All our Roses are on their own roots

H. T. Hybrid Texas.—H. P. Hybrid Perpetual—Cl. Climbers

Special prices on lots of one dozen or more upon application. Prices here quoted postpaid.

AMERICAN BEAUTY, (H. P.)—Rich carmine color, very large and fragrant. As a cut flower American Beauty has for years commanded the highest price of any rose on the market...Each—1 yr., 50c; 2 yr., $1.00

(Continued on next page)

Gladiola

The Gladiolus, as we know it today, easily takes a place in the front rank as one of the most useful and beautiful members of the floral kingdom. It is one of the most easily grown and universally adaptable of all flowers. In its stately, majestic and beautiful tints and variety of color blendings it has few equals. In the garden its long season of bloom, together with its great variety of color, form and types, makes it one of the most striking and noble of all garden subjects, and in the hands of the floral artist it lends itself to all manner and kinds of floral arrangement. It is suitable for a wide range of floral uses and as a decorative subject, has few if any equals.

The beautiful and easily grown Gladiolus should find a place in every flower lover’s garden. The bulbs or corms are planted two to three inches deep in most any soil and location, setting the bulbs about six or eight inches apart, in the row and the rows two feet or more apart. Cut the spike when the first flower opens and then placing in the water inside the entire spike will develop gradually its entire flower blooms.

The Gladiolus is a hardy tuberous Bulb, and is easily grown from seeds. It is a charming and beautiful flower, and the various kinds are well worth having in the garden. The best kinds are the large double spikes, and there are many varieties of these. The Gladiolus is a favorite with gardeners, and is easily grown in any soil and location. It is a hardy plant, and will live for many years if care is taken to protect it from frost. It is best planted in the fall, and the bulbs should be set about six or eight inches apart, in the row and the rows two feet or more apart. Cut the spike when the first flower opens and then placing in the water inside the entire spike will develop gradually its entire flower blooms.

Roses

LOS ANGELES, (H. T.)—One of the finest Roses ever introduced. The growth is very vigorous, and produces a long-stemmed flower of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of the petals. The buds are long and pointed. Each—1 yr., 60c; 2 yr., $1.10

CLIMBERS

DOROTHY PERKINS—Wichuraiana—A hardy climber. Soft shell pink in color, flowering profusely in large clusters. Fragrant and lasting. Each—2 yr., 75c

DR. W. VAN FLEET, W.—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a delicate shade of flesh-pink on the outer surface, deepening to rosy-desh in the center. Each—2 yr., 85c

TAUSENDSCHOEN—Soft pink, flowering freely in large clusters: vigorous and almost free from thorns. Each—1 yr., 35c; 2 yr., 75c

CRIMSON RAMBLER—Too well-known to need description. Each—1 yr., 35c; 2 yr., 75c

“IF IT’S A PLANT WE GROW IT”

I sent you an order the last part of February for one hundred Superb Strawberry plants. They arrived in fine condition and are doing fine. This fills my needs for this year.

JOHN A. MATHISEN.

Gladiola

GLORY OF KENMEMERLAND—The only true rose-colored Glad. Deep rose pink. Lower petals exhibit a pomegranate purple blotch on a creamy yellow ground. An unusual and pleasing color combination.

MRS. FRANCIS KING—Jasper red, lower petals splashed deeper red, throat lighter. Tall straight spikes. Excellent for forcing or cutting.

AUTUMN QUEEN—Cream yellow, upper petals suffused with pink, lower petals striped carmine red.

MARY FENNELL—Deep lilac with primrose throat, extra.

GEORGIA—Early cream yellow upper petals suffused pink, lower striped carmine red.

SPECIAL—One each of the ten varieties, Postpaid—$1.00

We grow single, Darwin and breeder tulips. Also crocus, narcissi and daffodils. Hycanths and other bulbs are imported. These bulbs are usually planted in late summer and fall. Please write for list and prices.

BULBS FOR SUMMER AND FALL PLANTING

Your productions are all right.

S. G. NOBLE,
Peach Gardens, Wash.

Peony

There is scarcely any other perennial that equals the Peony. The beauty and rarity of its delicate colors equals the rose and its massive boldness rivals the dahlia. Like all of the perennials, because of their permanence, it attracts the lovers of home flower gardens.

White September is the best time to set the roots, yet most of our clumps will bloom this year if set very early in the spring.

PEONY

AUGUST GOLD—Autumn shade... Each, 35c

H. J. LOVING—Immaculate, lilac shade on white... Each, 35c

CORAL QUEEN—A giant coral... Each, 40c

$1.40 $2.70 $9.00

We have thousands of testimonials from customers all over the west, including Canada, who voluntarily express their satisfaction with our plants and service.

Kelly Gardens Landscape Collection

This wonderful collection of plants will give you a riot of color during the whole season and will satisfy the most fastidious. This collection will plant a home ground, permanent plants at a fraction of the cost of the more elaborate nursery planting:

30 Privet, three year old.
10 Honeysuckle, Tartarian, three year old.
2 Syringa, Lilac, two year old.
6 Peonies, three colors.
50 Perennials of eighteen varieties.
2 Clematis.

The list comprising this wonderful lot of plants would cost purchased separately $35.00. Our special collection for landscape planting for a complete home ground, all charges paid to your express or postoffice at the special low price of $35.00

$35.00

**NOTE:** I will thank you for the names and addresses of those who plant and care for a garden, written on back of this sheet.
Flowering Plants

In beauty asters rank next to peonies and roses; their blooms are large and heavy and most brilliantly colored. Once you try them you will grow them every year for their beauty and because they are about the easiest flowers to raise. They make a grand cut flower and are a highly paying crop for that purpose. The most popular colors are the soft pink and lavender shades. They are extraordinary showy when planted in masses and no flower will show to better advantage than the aster in front of shrubbery or to fill vacancies in the hardy border. They will stand more cold than cabbage and can be sown or set out quite early. If sown as late as June the first, will give a good fall bloom, even in the North.

In order to get choice extra large blooms you must not allow more than about 10 blooms to each plant. It will pay you to disbud, as choice flowers always sell and all ways for a good price.

GIANT BRANCHING OR CREGO ASTER

A magnificent American strain especially adapted to our climatic conditions. The plants form strong, branching bushes about 2 feet high bearing on long stems their handsome chrysanthemum-like flowers averaging 4 inches or more across. They come to bloom from 2 to 3 weeks after the average type, thus lengthening the aster season until after frost. Extremely free flowering and a grand cut flower.

AZURE BLUE, CRIMSON, PINK, LAVENDER, PURPLE, ROSE, WHITE, YELLOW, MIXED, Postpaid, Doz., 30c; 100, $1.00; 1000, $10.00.

AGENIATUM—Low growing for edging, blue..............................................................................Postpaid, Doz., 36c

ALISSUM—White. Should be in every garden.................................................................................Postpaid, Doz., 36c

BALSAM—Charantia. An old favorite.................................................................................................Postpaid, Doz., 36c

FORGET-ME-NOT—Young plants ready in May will bloom this summer. Postpaid, Doz., 36c

PETUNIA—A handsome all season blooming flower.............................................................................Postpaid, Doz., 40c

SCABIOSA—Mixed. Your garden is hardly complete without this plant. Postpaid, Doz., 40c

SNAPDRAGON—Mixed. Very popular and beautiful flower, easily grown. Postpaid, Doz., 40c

VERBENA—Mixed. Fragrant and enjoyable. Euly grown.................................................................Postpaid, Doz., 40c

ZINIA—Mixed. Will grow anywhere and bloom continuously.........................................................Postpaid, Doz., 40c.

CARNATION

MIGNONETTE—Select choice varieties mixed. Postpaid, Doz., 36c; 50c, $1.25; 100, $1.50

SALVIA or SCARLET SAGE—One of the most easily grown annuals. Hardy and most beautiful blooms. You should include this in your order. A share of red all summer. Postpaid, Plants, Doz., 36c; 50c, $1.00; 100, $1.50

KOCHE (Mexican Fire Crch)—A quick growing foliage and hedge plant. Very attractive. Clean, bright green until early fall. When blooms appear, turning to a deep red tone. A hardy annual. Be sure to include this plant in your order. Postpaid, Doz., 36c; 50c, $1.00; 100, $1.50

AMARANTHUS—"MOLTEN FIRE" (Burbank’s)

Nothing can compare for royal abundance and brilliance of color. Has four feet in height by three feet in diameter. About August first you will have a bushy plant come two to three feet high with broad, brassy-orange colored like leaves. At this time the leaves at the top and all the side branches of the plant begin to open like gigantic dahlias of a surprisingly brilliant, iridescent color. Hardly to be found outside of an electric furnace, being of a clear, glittering, fiery, rose crimson, increasing in size and abundance until the whole plant is illuminated with hues, poignantly-like tuffs of flaming fire which can be seen for half a mile. These raise their brilliancy in best condition for three months or more. No other annual plant ever grown anywhere produces such a wealth of color for so long a time and for so little outlay of time and care.

PLANT PRICES—Postpaid—2 in Pkt. Each 2c; Doz., 30c

CELOSIA (Parrot’s Feather or Carnival)—The plants are stocky in growth, main stem and each branch being terminated by the most lovely flowers, varying from silver to pink to crimson, red, deep red, bright yellow and orange. Postpaid, Doz., 36c

CENT'AURA (Gypsophila—Daisy Miller)—The gray fern-like leaves make effective border. Grow 18 inches high. Doz., 30c

SAFETYGLASS—The flowers are of a vivid green much like Primula, but rivaling the latter in the beautiful colors displayed.

Aster

At our annual fall flower show it is conclusively demonstrated by the magnificent exhibits of dahlia blooms by amateurs as well as dahlia specialists that the dahlia will thrive anywhere in the West End Empire. The dahlia is of such easy culture with the mass of wealth of bloom that every home garden should be early and splendidly decorated.

My efforts are classified in the four most popular types, and in each classification you will find colors to suit the most fastidious. Out of the hundreds of varieties you will find these most popular.

CARNATION
